Mobile Application

Seamless User Experience

The app windows easily switches between home, switches and remote tabs to enable an effortless user experience.

Power Tracking Tab

The power tracking tab on the home dashboards displays your hourly and daily power consumption in real time.

Set Schedules & Routines

Set your appliances to power on/off at preset timings, create routines for a set of appliances so they can operate in sync without manual operation.

Lock Room Capability

This feature lets the user lock any room in the house via the app, so that he'll be notified of any intrusion immediately.

Option to share

home access
Share your smart home app access with all other members of your home

Scenes

Customize your appliances to create theme based scenes for you whenever you want them to. Ex: evening scene, birthday scene etc.

Workflows

Let your appliances make intelligent decisions based on their surroundings. Ex: Your AC automatically switches on when the room temperature reaches 30 degree Celsius.

Create auto-turn off timers

Set timers on your appliances so they only work for the required duration.

Remotes

Use your app as a substitute remote for all your physical IR remotes. Create custom remotes and default remotes

Inapp Entertainment Guide

Access your TV guide inside your app. Set favorites, reminders, access streaming links on your favorite channels and programs.

Features

Control from Anywhere

Control all appliances in your home from anywhere in the world.

Comfort and Convenience

Switch on/off appliances anytime from anywhere. No more worries about hassles at home.

Tighter Security

Monitor your home on the go. Set virtual locks on every room that'll smartly notify about any intrusion.

Live Power Tracking

Monitor hourly and daily power consumption at home in real time to help save more power.

Timing Set-up for all Devices

Set timers on any device, from light bulbs to water pumps.

Lighting Options Tailor made for you

Set custom light settings that turn on with a single tap to suit different moods- like movie night, party scene etc.

Smart Entertainment Control

Control all IR remotes with just the smartphone. Give a smart makeover to your DTH TV with new capabilities.

A Mobile App for the Beloved Master

Have complete control over the smart home with your phone. Keep an eye on your home from anywhere in the world.

The Voice Assistant

Your home's new best friend: With Amazon echo or Google assistant, use your voice as a remote to control all your appliances.

More Intelligence to your Appliances

Let your appliances customize their actions for you, without you having to play with the remotes all the time.

VOICE INTEGRATION

Control your smart home with even greater ease. Use your Google Assistant or Amazon Echo product to operate your appliances with just your voice!

"Hey **Google**, Turn on AC"

"Hey **Google**, Turn off AC"

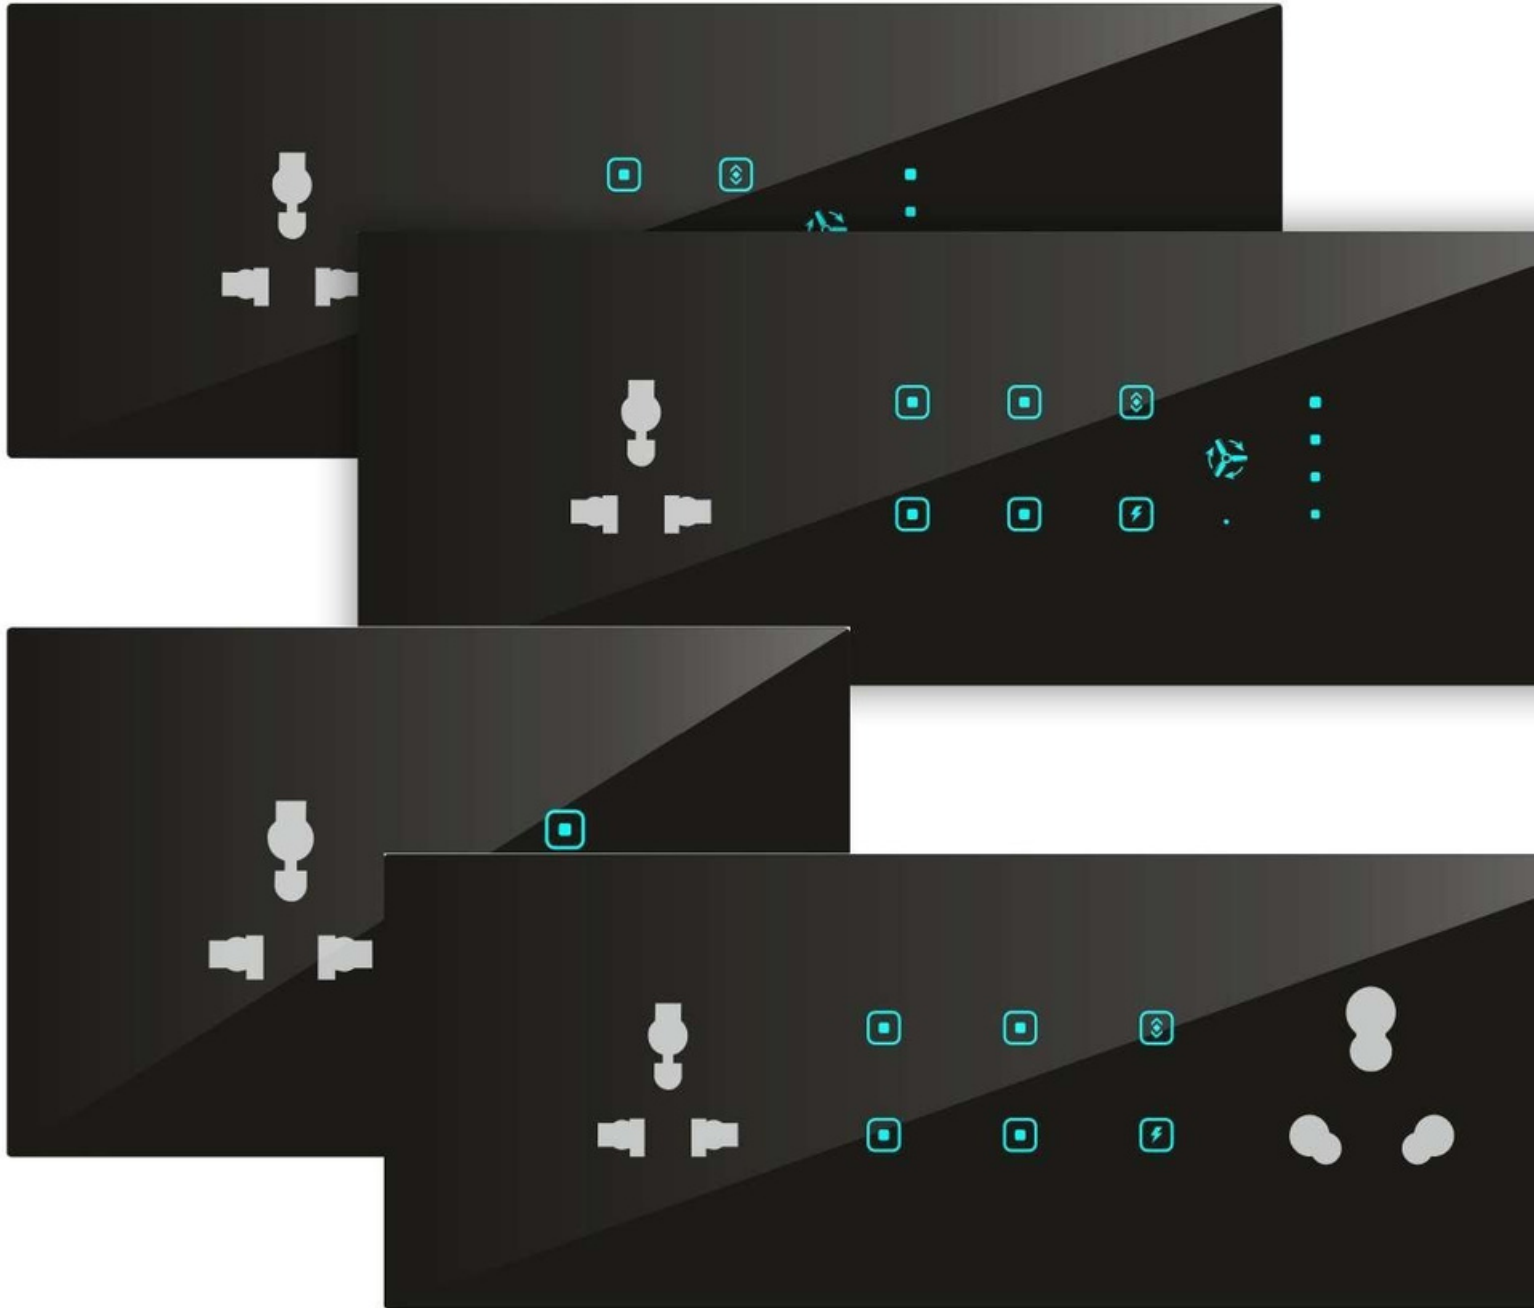

"**Alexa**, Turn on Geyser"

"**Alexa**, Turn off Geyser"

Wifi -Gas Sensor

More awesome, with workflows

Do cool stuff with workflows feature in WORKSAAT app.

When GAS leakage in Kitchen

- > Turn on Siren
- > Turn on exhaust fan
- > Send an alert to family

Wifi -Door Sensor

More awesome, with workflows

Do cool stuff like a wizard with workflows feature in WORKSAAT app.

When Bedroom door open @ 9:30 PM

- > Turn on Bedlamp
- > Turn on Fan & AC
- > Set AC temperature to 24°C

SMART IR

Say goodbye to your remotes

WORKSAAT smart IR is a universal portable remote which can act as a substitute for all IR remote controlled appliances. It is fitted with four IR blasters which can cover 360 degree radius. Smart IR can be connected to any USB power outlet (mobile chargers) and can be operated easily via Wi-Fi. It can be placed anywhere in the room to control appliances.

Supports

TV AC Projector Media Streamer BLDC Fans
AV Receiver Set top box Disk player Soundbars

RETROFITS

Switch on/off all your appliances and control fan speed remotely with smart switches. Avail all automation features in the WORKSAAT Home app such as schedules, routines, timers, and scenes. Do all of this from any where in the world. Control all of them using voice with Google Assistant and Amazon Alexa.

Sensor Strip : This device has the technology to control appliances that have an IR based remote, create temperature & humidity based workflows and more. it's supported with 4/6/2+1 Switches

POWER MODULES

Control heavy load and track energy parameters

WORKSAAT Power Modules are GSM/WiFi-based devices that can control attached load up-to 75Kw, measure power consumption and monitor multiple energy parameters in your plant. These devices can trigger workflows if they notice any accidental glitches in the power supply.

Built-in Energy Monitoring System provides an easy way to retrieve and analyze power quality events automatically. Unlike traditional energy management systems, WORKSAAT IoT system extracts the real-time energy consumption insights from your plant and provides you with useful data points on your Dashboard.
